

GTA WINDOWS START MENU ADDER

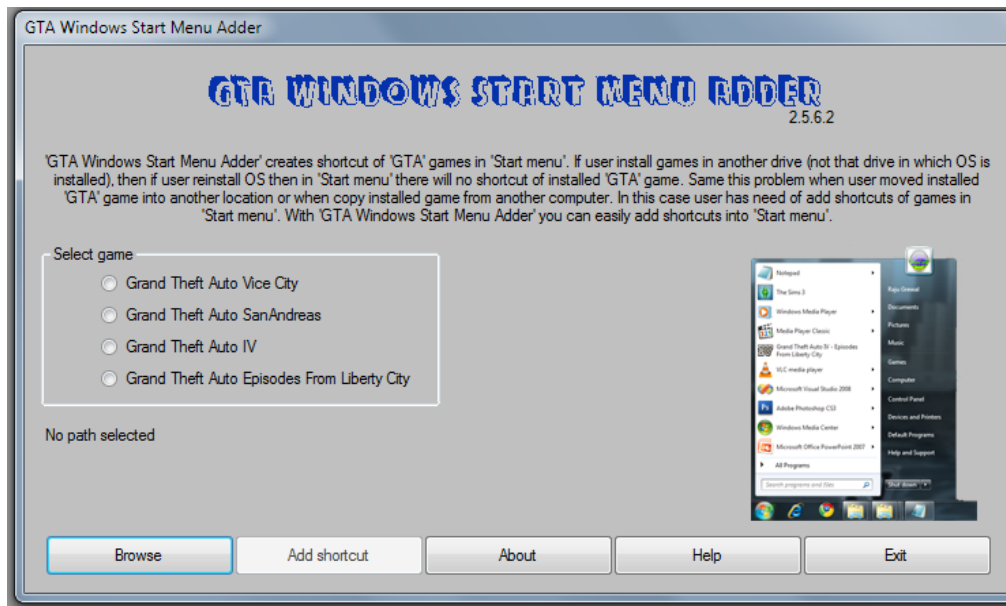

INTRODUCTION

Some time user can't play **GTA** game directly from **Start menu**, because **GTA** game not available into **Start menu**. There are many reasons of this. Such as:

- If user install games in another drive (not that drive in which OS is installed), then if user reinstall OS then in **Start menu** there will no shortcut of installed **GTA** game.
- When user moved installed **GTA** game into another location.
- When user has copied installed game from another computer.

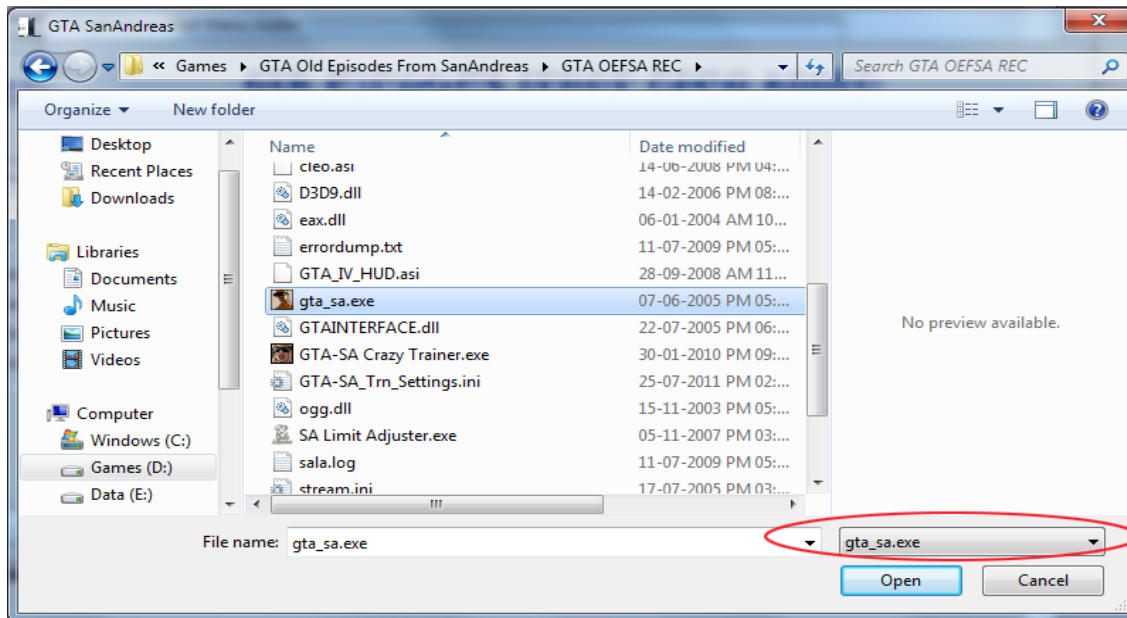

In this case user has need of add shortcuts of games in **Start menu**. With **GTA Windows Start Menu Adder** you can easily add shortcuts into **Start menu**. **GTA Windows Start Menu Adder** creates shortcut of **GTA** games in **Start menu**.

HOW TO RUN WINDOWS 7 TOOLS (PIC)

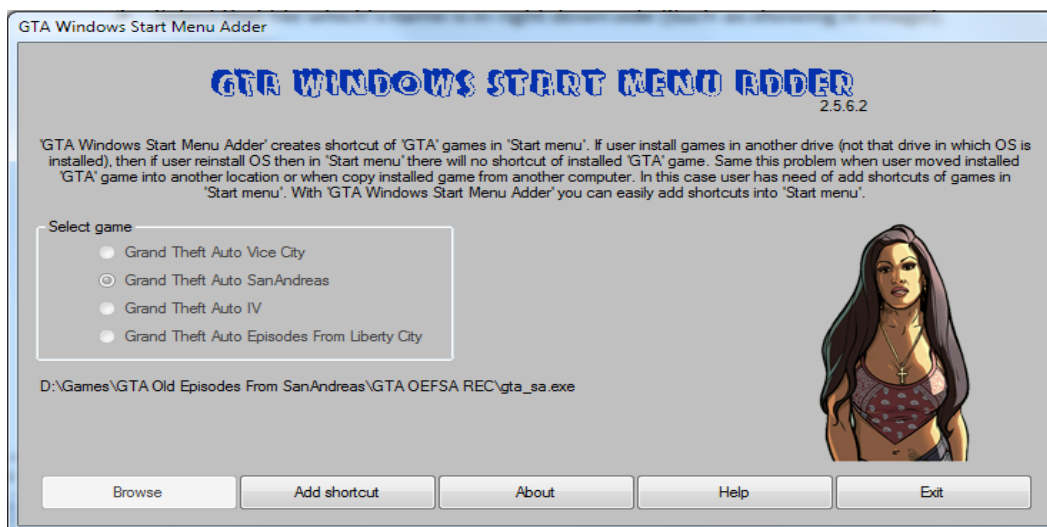

- Select game which you want to add in **Start menu**.
- Click on **Browse** button

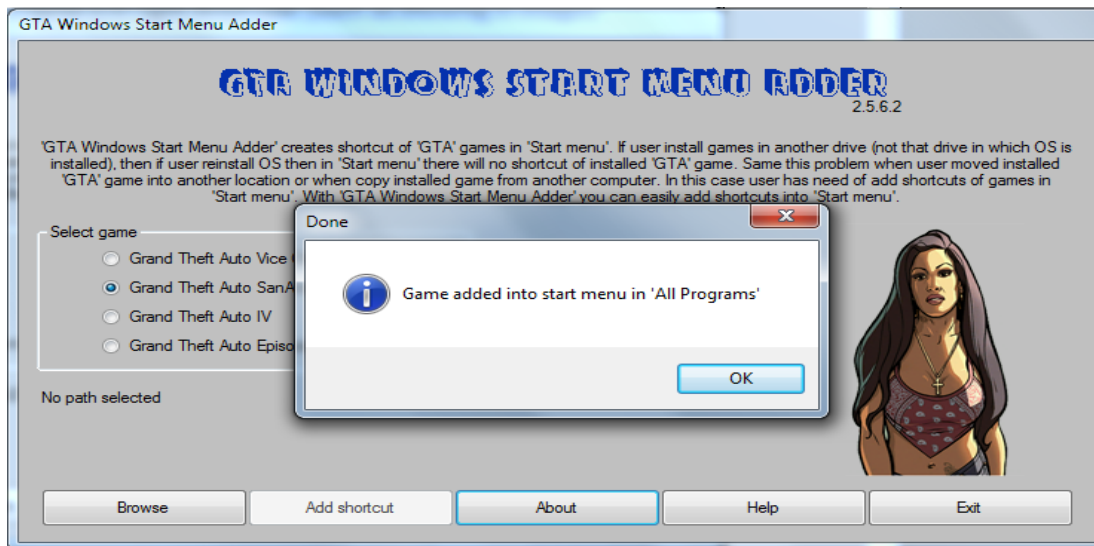

- In this windows open that folder in which game is installed
- Select that file which's name is in right down side (Such as showing in image).

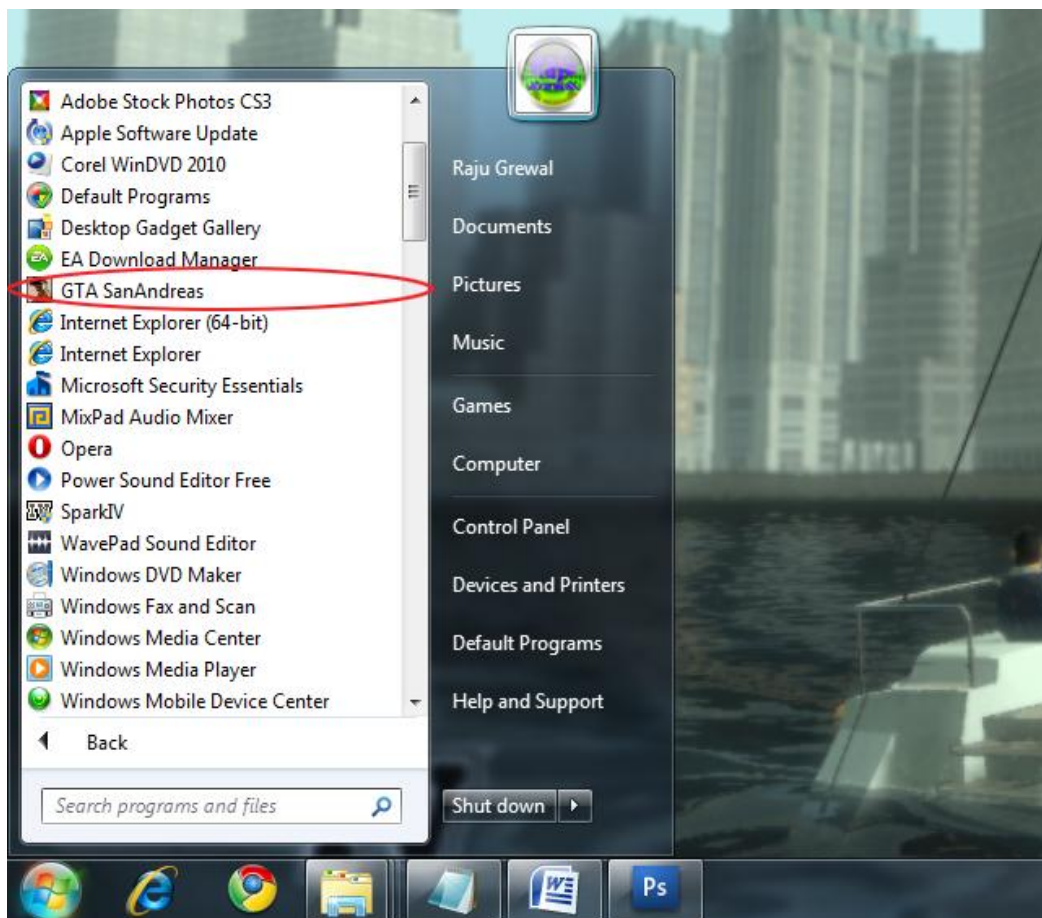

- Click on *Open* button

- Click on *Add shortcut* button
- A message box will show, click *Ok* button

- close *GTA Windows Start Menu Adder* by click on *Exit* button
- open Start menu

In *start menu*, in *All Program* section you will find your game. You can play your game from here.
